

5. Project Development Phase

Project Module: Laptop Request Process

Phase Description: Technical configurations, building the Flow chart actions, configuring SMTP Email logs, and catalog items.

This document serves as the formal milestone artifact for the ServiceNow development workflow lifecycle. Paste the relevant development environment evidence below.

Form Configuration & Variable Setup

- **Created Application Envelope:** Created the application scope FlowDesk inside native ServiceNow PDI.
- **Built Catalog Item:** Created a custom catalog item named "Laptop Request" to handle user form submissions.
- **Configured Variables:** Added three specific input fields:
 - requested_for (Type: Reference to User table)
 - laptop_type (Type: Select Box with choices like MacBook, Dell)
 - business_justification (Type: Multi-line Text)
- **Applied UI Ordering:** Set sequential ordering (100, 200, 300) to align the fields cleanly on the portal view.

Flow Logic & Core Action Building

- **Trigger Mechanics:** Programmed the backend flow to trigger automatically when a laptop catalog item is requested.
- **Dynamic Manager Lookup:** Embedded a scriptless lookup step to find the employee's direct manager record dynamically.

- **Approval Decision Gate:** Configured a native workflow loop split condition to route an active task block to the manager's approval panel (sysapproval_approver).

Fulfillment Tasks & Email Actions

- **IT Task Generation:** Added a core action to automatically spawn an IT fulfillment task ticket (sc_task) only if the request is marked as approved.
- **Direct Email Dispatch:** Configured the native "Send Email" flow actions to pull dynamic data pills and fire status update alerts directly to users.

Visual Implementation Evidence

CATALOG ITEM (try it)

The screenshot shows the ServiceNow interface for creating or editing a Catalog Item. The breadcrumb trail is 'Catalog Item - Laptop Request'. The form includes the following fields:

- Name:** Laptop Request
- Application:** FlowDesk
- Active:** ☒
- Category:** Can We Help You?
- Fulfillment automation level:** Unspecified
- State:** -- None --
- Checked out:** -- None --
- Owner:** System Administrator

Below the form, there is a section titled 'FLOW STEPS :'. The first step is a 'TRIGGER' block for 'Service Catalog'.

FLOW STEPS :

The screenshot shows the configuration for the 'TRIGGER' step in the flow. The trigger is set to 'Service Catalog'. Below the trigger, there is an 'Advanced Options' dropdown menu. At the bottom right, there are three buttons: 'Delete', 'Cancel', and 'Done'.
